

This is an optional connector preparation tool for CELLFLEX® cables with solid inner conductor.

- It helps to remove the residual dielectric from the inner conductor of cables during the preparation for connector installation.

- It enables clean contact areas without any risk of surface degradation.

**FEATURES / BENEFITS**

- Enables clean contact surfaces without risk of scratching and nicking
- Finger grippers permit application of sufficient force
- Removes dielectric close to the cutting area
- Helps to fulfil the electrical performance of connectors, especially PIM, more easily and consistently
