## New solutions for the most demanding applications

### Have you already visited our website?

At [www.ssb-electronic.com](http://www.ssb-electronic.com) you'll find our products structured not only by category, but directly by **application**.

Requirements for RF cabling and components are continuously increasing: higher frequencies, harsher environments, and ever more specialized use cases. That is why we have expanded our **industry-specific** solutions and further developed them specifically for **mission-critical and high-reliability applications**.

Under **“Our Markets”** you can now find dedicated **solutions** for **aerospace, military & defense, explosive areas, test and measurement environments, railway construction, maritime applications, and many more**. Whether cables, connectors, RF and microwave components, or cable assemblies — simply select your **field of application** and discover suitable components for your application.

We will be happy to support you with technical expertise in selecting the right **solution** for your project.
