SSB NEWS

Passion in high frequency

PMRExpo 2026 starts next week!

From November 24 to 26, we will be exhibiting at PMRExpo in Cologne. We are looking forward to the personal exchange with you and would like to show you on site which products and solutions you can expect from us.

The focus will be on our SSB coaxial cables, RF connectors and low-noise preamplifiers for professional radio and communication systems.

But our portfolio offers much more:

- **Special cables** – from corrugated, fiber optic and hybrid cables to data, bus and drag chain cables.
- **Cables for special requirements** – for example for railway, marine, building technology, industry as well as test and measurement applications.
- **Reception technology, RF and microwave components** as well as **assembled cable solutions.**

Whether special environmental conditions, specific standards or demanding RF applications – we are happy to talk about your individual requirements at PMRExpo.

Koelnmesse
Hall 8.1 | Booth D-072

Nov. 24 – 26, 2026

Would you like to already schedule a personal meeting?

Feel free to send us a short message.
