

Mounting instruction

Ecoflex[®] 10, Aircom[®] Premium

UHF plug / Item no.: 7377

www.ssb-electronic.com

Required tools: 1 x cutter knife 1 x scissors 1 x soldering station 1 x solder		1	
			Cut off cable tail right-angled. Remove 26 mm of the outer jacket with a knife.
2			Shorten the copper braid to 10 mm.
3			Bend the copper braid back, score the copper foil with a cutter knife and remove it completely.
4			Remove 16 mm of the white dielectric.
5			Slide the connector sleeve over the cable. Screw the connector housing onto the cable end.
6			Carefully solder the inner conductor from the front.
7			Screw the connector sleeve onto the connector housing.
